公司简介 | Company Profile

Foshan Qianshuo Technology Co., Ltd. is the company, based in Foshan, Guangdong. QSENCE is Qianshuo ' s 3D printer filament brand. We modify our own materials and run our own extrusion lines for global distributors, OEM brands and industrial buyers, covering molds, 3D printer equipment, and QSENCE filament.

Qianshuo runs its own compounding and 20 filament extrusion lines, with monthly filament capacity of 500 tons. PLA, PETG, ABS, TPU and engineering grades are made in-house, with laser-monitored diameter control (± 0.03 mm), vacuum packaging and TDS / COA / MSDS. We support private-label OEM, bulk wholesale and FOB/CIF/DDP.

Quality inspection and export logistics run from our own lines, so clients in Europe, North America, Southeast Asia and other markets can move from sample rolls to container loads on one factory.
